

# Health & Safety Training Courses & Assessments:

## Asbestos Awareness.

### Course Overview:

This course has been designed to help individuals develop an awareness to the risks relating to asbestos containing equipment and materials in the workplace.

### Who is this training course for?

The course typically applies to, but is not limited to the following:-

Electricians, Plumbers and Gas Fitters, Architects & Building Surveyors, Computing and telecommunications Engineers, Construction and Demolition Workers, Fire and Burglar Alarm Installers, General Maintenance Staff, Heating and Ventilation Engineers, Joiners and Plasters, Painters & Decorators and Roofers.

### Course Duration:

1 day in-house training at our purpose built training centre.

**This course is also available as an on-site training course dependent on candidate numbers.**

### Topic Areas Covered:

- ◆ Understanding what asbestos is and its uses.
- ◆ Understanding the nature of and properties of asbestos.
- ◆ Understanding the types of disease caused by exposure to asbestos.
- ◆ Knowing which processes release asbestos.
- ◆ Identifying who is at risk and how to avoid the risks from asbestos.
- ◆ Understanding the requirements of current legislation.
- ◆ Risk Management and protecting people.

### Training & Assessment methods:

All candidates will receive a course study workbook prior to attending the course designed to give them an understanding of the topic area before attending the course. Candidates will be required to successfully complete a written examination.

Please note: This **IS NOT** an online training course.

### Course Achievements:

Successful candidates will be awarded a Cert-ain certificate of competence in Asbestos Awareness.
