

# Plumbing & Water Training Courses & Assessments:

## Sanitation & Drainage.

### Who has to comply with the Water regulations?

The Sanitation & Drainage Training Course provides the fundamental requirements of above ground drainage and rainwater systems and is designed to meet the requirements of current building regulations.

### Who is this training course for?

This course is aimed at practicing plumbing and heating engineers who already have some knowledge of above ground drainage and rainwater systems.

### Course Duration:

1 day - 8:30am to 4:30pm.

**This course is also available as an on-site training course dependent on candidate numbers.**

- ◆ Legislation and key installation requirements.
- ◆ Types of system pipework and design.
- ◆ Self sealing valves.
- ◆ WC Macerators and waste disposal units.
- ◆ Commissioning above ground sanitary pipework.
- ◆ Rainwater system design and installation.

### Training & Assessment methods:

All candidates will receive a Vented and Un-Vented Hot Water Storage Systems Training Course workbook 3 weeks before the assessment date in order for them to complete the self-learning modules.

During the morning session on the date of the assessment, a formal tutorial and review of the candidates completed workbook will be held followed by a multiple-choice assessment during the afternoon session.

### Course Achievements:

Successful candidates will receive LOGIC Sanitation & Drainage certification.
